# REMAZEL ENGINEERING: MANAGEMENT SYSTEM

Since April 2008, Remazel Engineering management system is certified ISO 14001 for environmental aspects, which provides our Company to comply with the relevant regulations and considering also a Risk evaluation in this direction.

As per our Business model, which provides the outsourcing of all the «pure» production activity, Company's production-linked consumptions can be generally considered at a low-environmental impact.

The consumption registered in terms of electricity and water are mainly related to “civil consumption” and, for this reason, we encoded in our procedure the following documentation:

- “Energy saving suggestions pills”
- “Recycling instructions”
- “Recycling Procedures”

The above mentioned documentation is provided in attachment in Italian version.

**intertek**  
Total Quality Assured.

# REMAZEL ENGINEERING: OUR «GREEN» CONSIDERATIONS

As «People Organization» we have considered that we could still contribute to CO2 emissions reduction by modifying our daily habits and act more responsively as individuals in respect of the Environment both inside and outside the organization.

In late 2018 Remazel Engineering launched «Company In Action» Project, a specific initiative which gather together all the activities and actions we are pursuing as individuals for People, Social Responsibility and Environment.

This Project started with great success with Team Building and Social Responsibility initiatives through the support of Local Organizations, and has grown by including «green» actions aimed at the respect, even in a small way, of the Environment:

# #MYPLASTICFREECOMPANY: IN DETAILS

**#MyPlasticFreeCompany** Project has been presented in 2019 during the Second Company Meeting of the year, with the major aim to raise people awareness about **PLASTIC CONSUMPTION** in general and, in specific, in our workplace.

An evaluation has been carried out taking in consideration the annual plastic consumption mainly referred to waters plastic bottles and cups.

**From October 2018 to November 2019 the automatic machines** dispensed around **6000** plastic bottles (considering Remazel's offices and «Chiuduno 1» factory).

In 2020 we have been able to provide the following:

- **Personal Water Bottles** for all the Employees
- **All the «sharing spaces» have been equipped with:**
  - **Water Dispenser** to allow the complete disposal of Plastic Bottle (both for water and other liquids) from Company's vending machines;
  - The plastic tableware has been replaced by **organic disposable** ones;
- All the Meeting Rooms have been provided with **glass jugs and glasses** in order to limit plastic cups consumption (in complete respect of hygiene standards, the canteen has been equipped with a dishwasher for high temperature washing sterilization);
- The Automatic coffee machine has been provided with paper cups instead of plastic ones (a bit more expensive but with zero-impact!).
